

Credit Risk Transfer Handbook

March 2024

Mission is at the heart of all we do at Freddie Mac. We pioneered agency Single-Family Credit Risk Transfer (CRT) to reduce credit risk to U.S. taxpayers, while supporting the liquidity, stability and affordability of the country's housing finance system. Along the way, we created innovative opportunities for private investors to participate in the U.S. single-family residential credit market.

This handbook is designed to familiarize you with some of those opportunities, including Freddie Mac's complementary capital markets and (re)insurance CRT executions, STACR® and ACIS®. It further provides a close-up view of Freddie Mac's risk management framework and quarterly U.S. housing statistics.

- Kevin Cheng, Vice President, Head of Mortgage Assets & Risk Transfer

Development of an Asset Class

Freddie Mac's Role in U.S. Housing Finance

Freddie Mac was chartered by the federal government in 1970 to provide liquidity, stability, and affordability to the housing market.

1 Lenders originate loans.
Lenders include banks, credit unions, mortgage brokers and others. They originate loans per the Single-Family Seller/Servicer Guide and sell loans to Freddie Mac.

2 Freddie Mac overlays its credit risk management framework on purchased loans, ensuring loan quality.
Underwriting and Quality Control processes take advantage of proprietary data models and intelligent automation to ensure all loans meet Freddie Mac underwriting standards.

3 Interest rate risk is passed through to investors by guaranteed Uniform Mortgage-Backed Securities (UMBS®).
Investors include Federal Reserve, money managers, hedge funds, banks, credit unions and more.

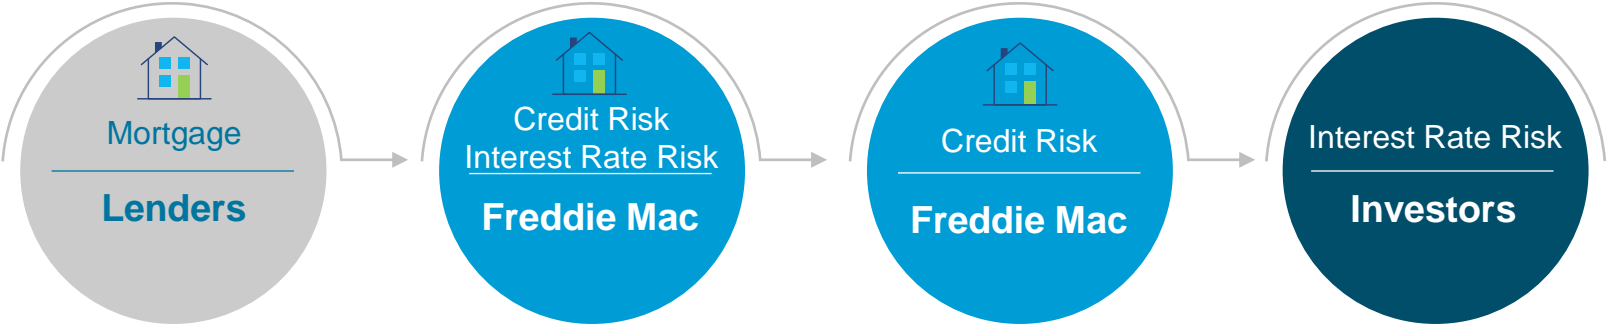

4 Credit investors gain exposure to the U.S. mortgage market through innovative risk-sharing offerings.
Investors include money managers, hedge funds, (re)insurers, Real Estate Investment Trusts (REITs), insurance companies and other investors.

Sustainable Business Model

Old Model

Buy and Hold Credit Risk

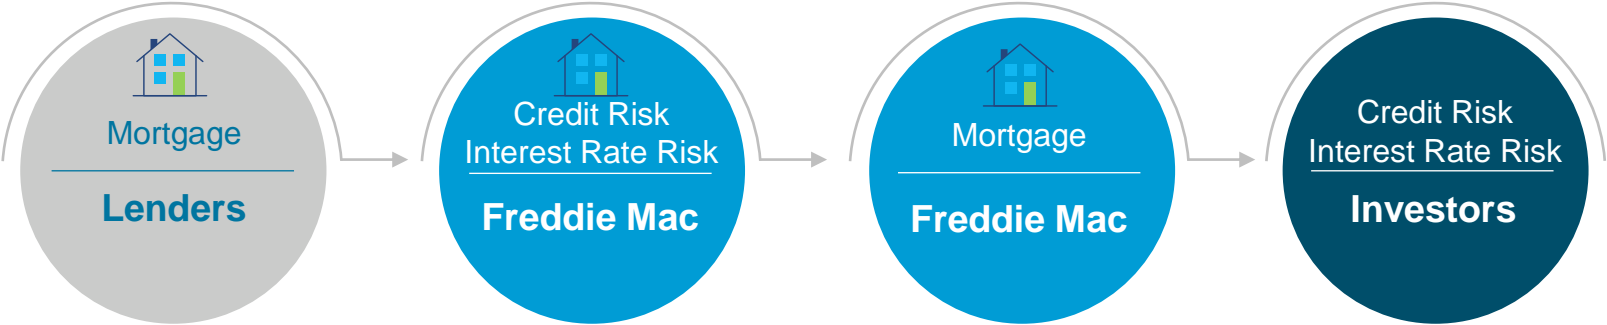

Interest Rate Risk Transfer

Uniform Mortgage-Backed Securities (UMBS):

Pass-through securities representing an undivided interest in a pool of residential mortgages which transfer interest rate risk to investors. Freddie Mac guarantees the timely payment of interest and scheduled principal on all UMBS' issued by Freddie Mac.

New Model

Buy and Transfer Credit Risk

Credit Risk Transfer

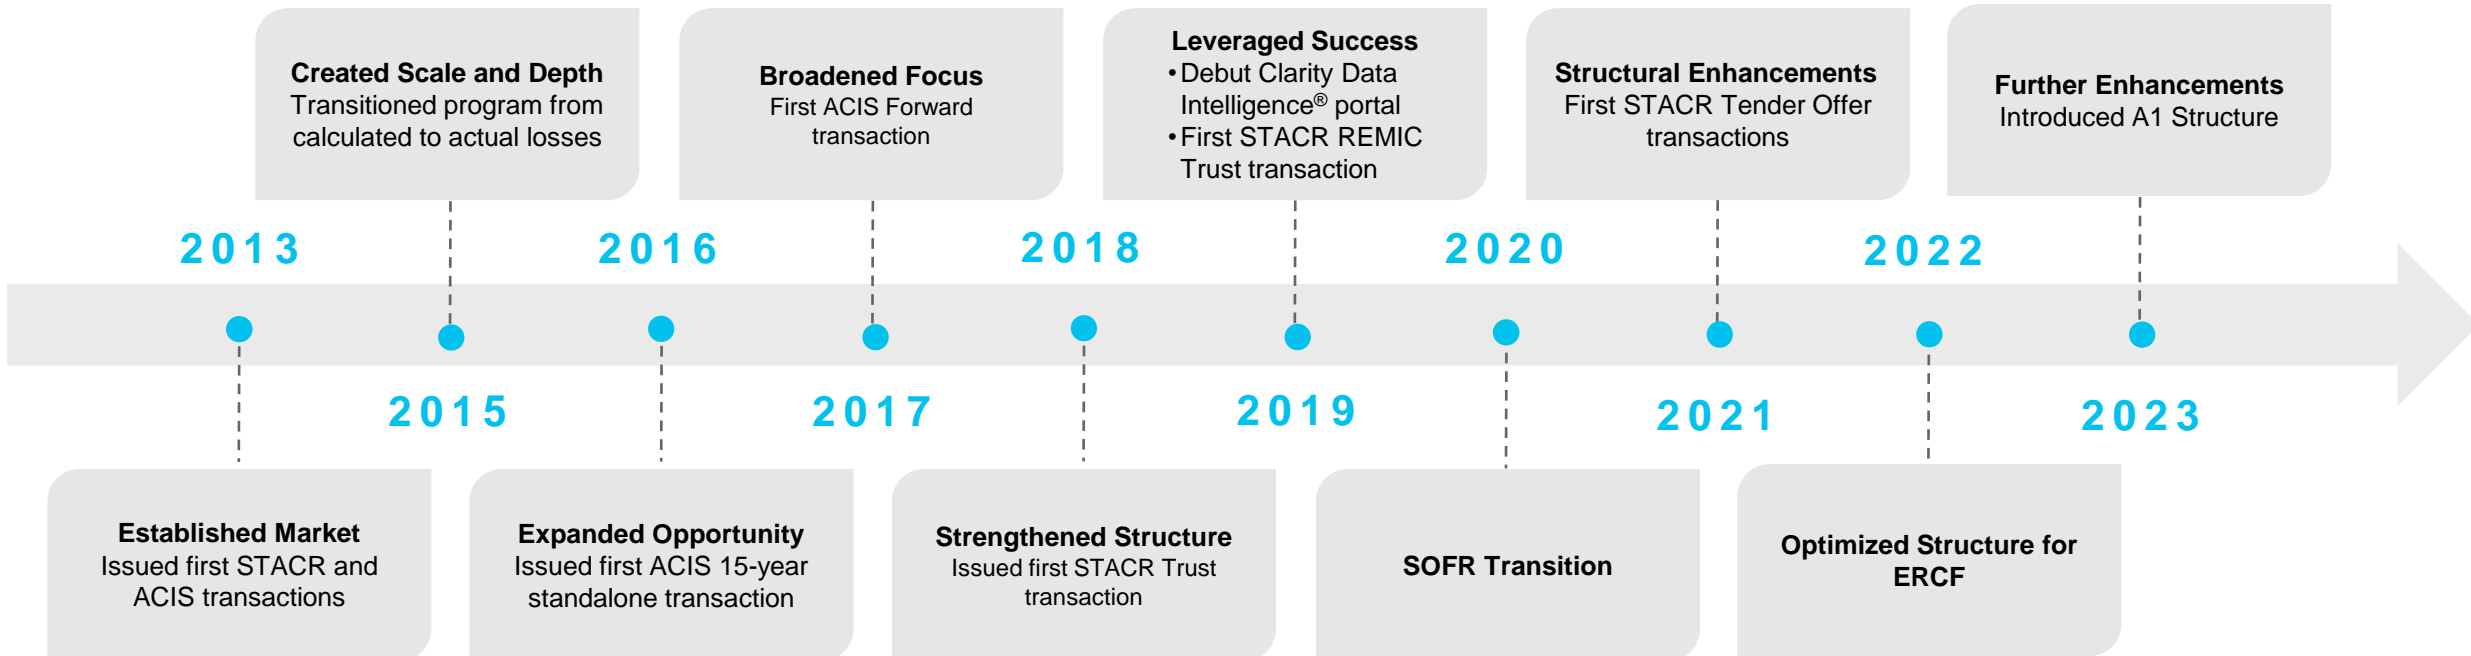

Structured Agency Credit Risk (STACR®) Trust:

Freddie Mac's flagship securitization credit risk sharing vehicle. STACR transactions transfer risk to the private capital markets through the issuance of unsecured and non-guaranteed notes. The bankruptcy-remote trust makes periodic payments of principal and interest on the notes to investors.

Agency Credit Insurance Structure (ACIS®):

Freddie Mac's flagship insurance-based credit risk sharing vehicle. ACIS transactions are insurance policies issued by or ceded to global (re)insurance companies to cover a portion of credit risk on the STACR or standalone reference pools. Freddie Mac pays monthly premiums to (re)insurers, based on their tranche participation, in exchange for claim coverage on their portion of the reference pool.

STACR[®] and ACIS[®]

STACR and ACIS

1. Transaction Overview

Loan Origination

Lenders originate loans to borrowers according to Freddie Mac origination guidelines. Freddie Mac purchases such loans and guarantees securities backed by the loans.

UMBS Packages

Loans purchased by Freddie Mac are grouped and sold to Uniform Mortgage-Backed Securities (UMBS) investors, transferring interest rate risk away from Freddie Mac.

CRT Eligibility

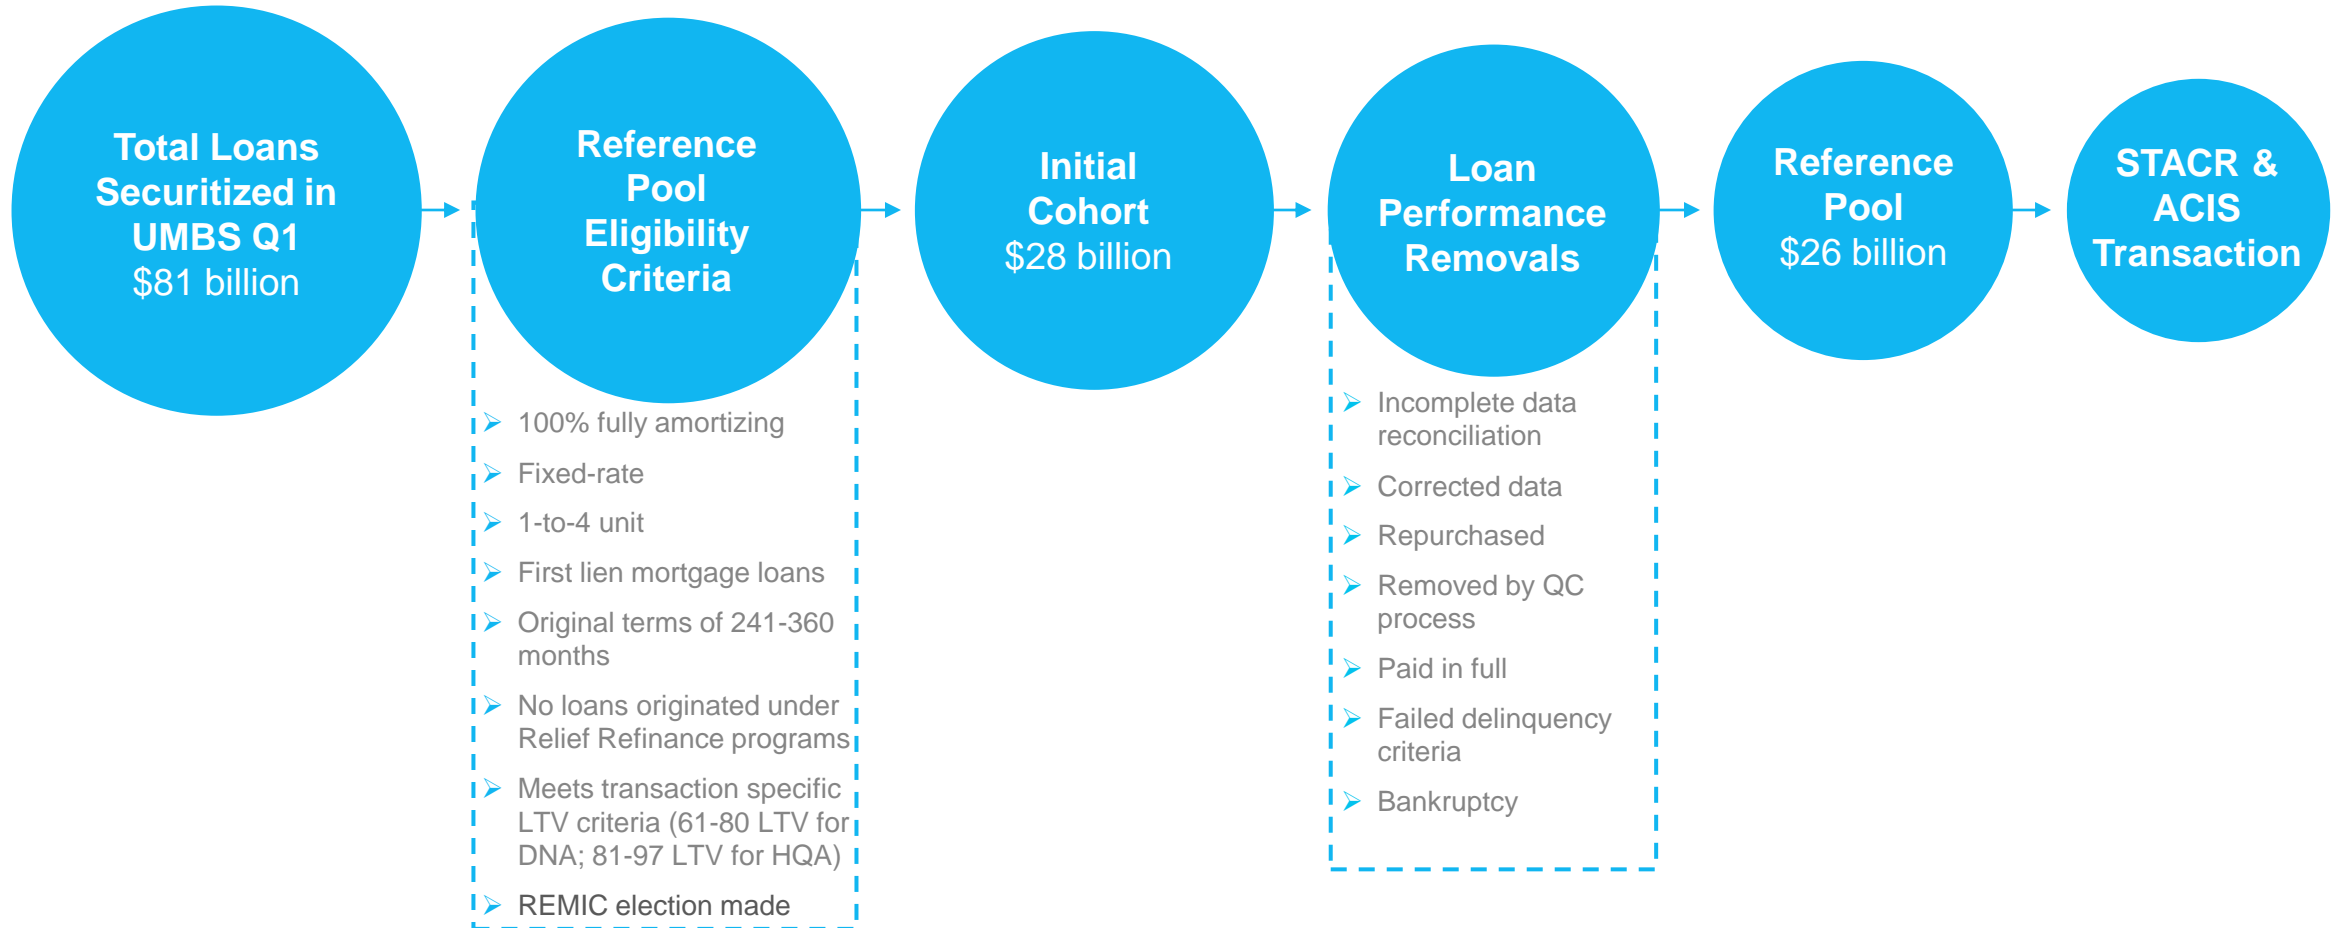

Loans backing the guaranteed securities (UMBS) are subject to additional CRT eligibility requirements and screened for underwriting defects and performance deficiencies before being included in a CRT transaction.

Transaction Issuance

STACR and ACIS deploy similar financial structures. Freddie Mac maintains “skin in the game” by retaining all or a portion of each tranche, thus aligning Freddie Mac and investor interest with reference pool performance.

Loan Advisor

Freddie Mac Loan Advisor® is a smart, end-to-end technology solution built to provide greater certainty about the quality of loans and offer insight into loans' purchase eligibility early in the loan production process. Loan Advisor's advanced analytics and modeling capabilities automate processes, catch errors and identify opportunities to reduce risk.

Freddie Mac's goal is to have 100% of loans processed through Loan Product Advisor or Loan Quality Advisor*

Loan Advisor is set up so the Exclusionary List is only accessible by approved Seller-Servicers

Loans sold to Freddie Mac must have documented evidence of the mortgagor's ability to repay and of the value of the property

Appraisal independence rules insulate the appraiser from influence by other parties involved in processing or originating the loan

Representations & Warranties require the Seller/Service to repurchase the loan if there is a material underwriting defect discovered, subject to certain limits

*Does not include bulk deals

Loan Product Advisor[®]

Loan Product Advisor (LPASM) is the cornerstone of Loan Advisor. LPA takes advantage of proprietary data models and intelligent automation to promote loan compliance with Freddie Mac underwriting standards.

Features innovative tools and offerings leveraging algorithms to enhance the origination process

Home Value Explorer[®] (HVE)

An automated Freddie Mac tool used to determine values of properties inside and outside of Freddie Mac.

Automated Collateral Evaluation (ACE)

An offering that eliminates the need for a traditional appraisal for properties that have valuations validated by HVE.

Asset and Income Modeler (AIM)

An Automated Underwriting System (AUS) solution used to verify borrower assets and income. AIM is the first and only AUS solution in the industry to also assess self-employed income.

Generates an assessment of a loan's credit risk and overall quality

- ✓ Minimum credit score requirements
- ✓ Maximum debt-to-income ratio limits
- ✓ Maximum loan-to-value ratio limits
- ✓ Elimination of risky products (IOs, pay option ARMs, no documentation and balloons)

Quality Control (QC)

Freddie Mac performs QC across all purchased loans, including those that are credit enhanced by any of the CRT programs. Losses are mitigated through a comprehensive QC program across performing and non-performing loans, including third-party QC processes by lenders.

	<p>Performing Loan QC</p>	<ul style="list-style-type: none"> ▪ Regularly perform QC on a random and targeted basis to test the quality of recently purchased loans, including added focus on key elements of particular interest or concern (e.g., loan attributes or Sellers). ▪ Freddie Mac benchmarks every loan we purchase against our valuation model and appraisals are assessed within our automated system, Loan Collateral Advisor® for instantaneous feedback to the originator. ▪ CRT transactions perform a separate Due Diligence review.
	<p>Non-Performing Loan QC</p>	<ul style="list-style-type: none"> ▪ Freddie Mac also reviews mortgage loans that default within the first few years after purchase or guarantee.
	<p>Seller In-House QC</p>	<ul style="list-style-type: none"> ▪ Each loan Seller must have an in-house QC program that has written procedures and operates independently of the sellers' origination and underwriting functions. ▪ Freddie Mac reviews, monitors, and provides feedback on sellers' QC and origination practices, including performing on-site reviews of its largest Sellers.

Seller/Service Management

Freddie Mac believes that a well-rounded view of servicing performance supports a broad and in-depth analysis of both performing and non-performing loans.

Account Plans

- Focused on covered National, Regional and Community Servicers, Independent Mortgage Bankers, Specialty Servicers, Master Servicers and Subservicers.
- Sets goals and objectives, establishes agreed-upon action plans and milestones.

File Reviews, Rewards and Remedies

- Identifies servicing performance gaps and trends, encourages and rewards quality servicing.
- Helps identify and resolve issues and provides consequences for poor data quality and servicing processes.

Servicer Success Scorecard

- Covers Master, Interim, Sub and Consolidated servicing modes
- Performance evaluation specific to servicer segments (ranked groups), uses synthetics and ranks.
- Provides loan level data and analyses.
- **Freddie Mac Servicer Honors and Rewards Program (SHARP)SM** – enables eligible servicing clients to receive annual rewards based on completion of the Servicer Success Scorecard.

Counterparty Operational Risk Evaluation (CORE)

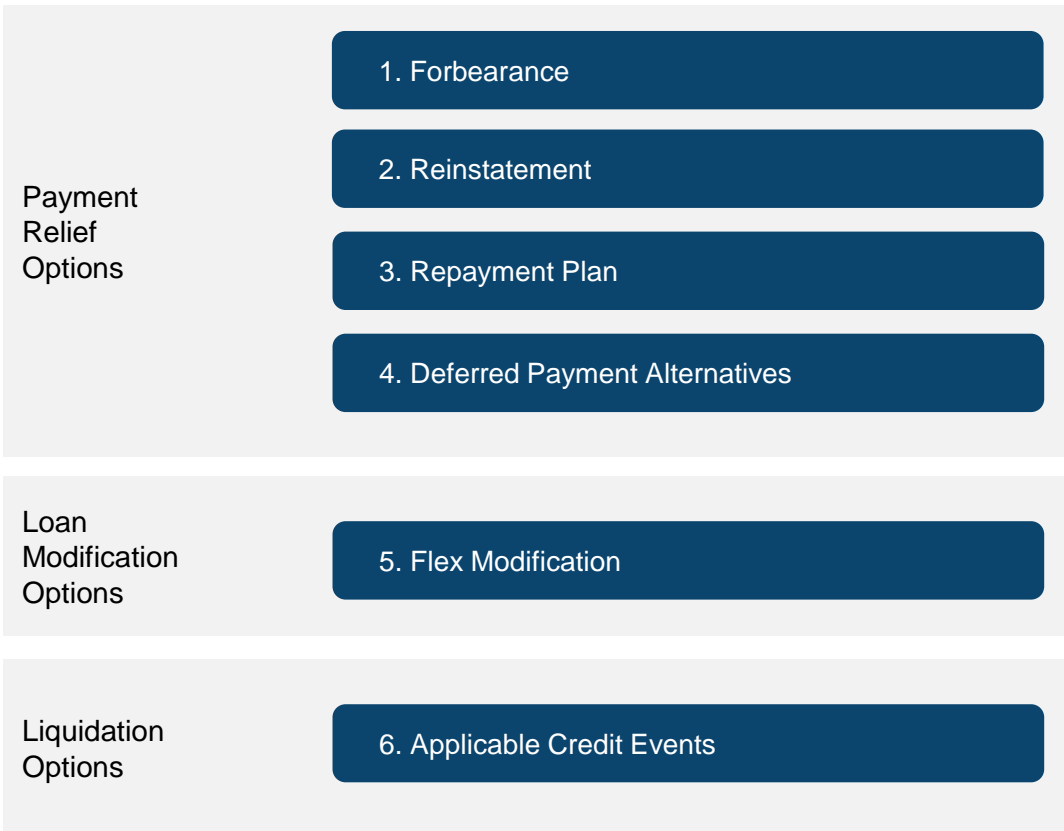

- Identifies Single-Family counterparty operational risk issues and monitors remediation.
- Provides assessment of Counterparty's compliance with Guide requirements.
- Conducts on-site due diligence of Servicers' preparedness for large MSR transfers.
- Works closely with account managers and Single-Family Operations to ensure review scope addresses new/ emerging risks.

Credit Risk Management Framework

2. Loss Mitigation

Loss Mitigation

1. Forbearance	Provides a temporary reduction or suspension of payments to give borrowers a specified period of time to improve their financial situation. No mod loss impact.
2. Reinstatement	The most desirable resolution for a temporary hardship. Reinstatement is the act of restoring a delinquent Mortgage to current status.
3. Repayment Plan	Gives the borrower a defined period of time to reinstate the Mortgage following a temporary hardship by paying normal regular payments plus an additional agreed upon amount in repayment of the Delinquency.
4. Payment Deferral*	A relief option for borrowers who became delinquent due to a short-term hardship that has since been resolved. Past due payments are deferred (non-interest bearing) and will be due at maturity, payoff date, or upon transfer or sale of the Mortgaged Premises.
COVID-19 Payment Deferral*	Leverages a similar concept to the Payment Deferral solution. An eligible borrower will be brought current by deferring delinquent amounts to create a non-interest bearing balance that will become due at the earlier of the Mortgage maturity date, payoff date, or upon transfer or sale of the Mortgaged Premises.
Disaster Payment Deferral*	As with the Payment Deferral and the COVID-19 Payment Deferral, under the terms of a Disaster Payment Deferral an eligible Borrower will be brought current by deferring delinquent amounts to create a non-interest bearing balance that will become due at the earlier of the Mortgage maturity date, payoff date or upon transfer or sale of the Mortgaged Premises.
5. Flex Modification	An affordable modification that provides significant payment relief to eligible borrowers, leverages requirements of the Freddie Mac Standard and Streamlined Modifications.
6. Applicable Credit Events	Credit Events such as short sale, third party sale, deed-in-lieu, REO disposition

*Starting with STACR 2021-HQA3: Cost of Payment Deferral will be included in modification related costs

Sustaining Homeownership During COVID-19

Workout Options – What Are They?

Relief Options

Reinstatement: An option to catch up on all the missed payments at once in a single lump-sum payment.

Repayment: An option to spread out past due amount on the mortgage over a set time frame (e.g., 3, 6, 9 or up to 18 months) and added onto the existing mortgage payments.

Payment Deferral: An option to defer up to two monthly delinquent amounts to create a non-interest bearing balance that will become due at the earlier of the mortgage maturity date, payoff date, or upon transfer or sale of the mortgaged premises.

COVID-19 Payment Deferral (Effective July 1, 2020): An option to defer up to eighteen monthly delinquent amounts to create a non-interest bearing balance that will become due at the earlier of the mortgage maturity date, payoff date, or upon transfer or sale of the mortgaged premises. The hardship must be related to COVID-19.

Modification Options

Flex Modification: An option for borrowers who can no longer afford their pre-forbearance payment. It adds unpaid balances from a forbearance period to an unpaid loan balance. The payment reduction is calculated depending on the LTV.

STACR Trust Structure

Transition to SOFR-Indexed CRT Issuance

- Reducing LIBOR exposure and LIBOR transition risk for investors has been a high priority for Freddie Mac
- Freddie Mac has been a market leader in LIBOR transition and successfully issued floating rate notes (FRNs), agency CMOs, Multifamily K-Deal[®] and a STACR deal that are indexed to SOFR

Since developing the tender offer program in 2021, Freddie Mac has successfully conducted ten STACR[®] tender offers, totaling approximately \$11 billion original principal amount in repurchased bonds.

STACR[®] tender offers allow Freddie Mac to reduce the interest expense on STACR[®] notes that no longer provide economically sensible credit protection to Freddie Mac. After a tender offer, all STACR[®] notes that are tendered and accepted are retired and cancelled.

STACR[®] tender offers inject liquidity to the market, especially for less liquid, off-the-run STACR[®] notes. All STACR[®] tender offers have provided noteholders with an opportunity to sell eligible STACR[®] notes at an announced tender price, without any adverse impact on the secondary market. For noteholders who decide not to tender, their notes remain outstanding, and the bond payments and credit enhancement levels are not affected by tender offers.

Through STACR tender offers, Freddie Mac accelerates principal payments to CRT noteholders, allowing them to potentially reinvest in on-the-run CRT new issue notes.

Since 2021, Freddie Mac has exercised its 5-Year ACIS call option to wind down over \$1 billion in out-of-the-money coverage and save over \$100 million in future premium spend.

Freddie Mac retains sole discretion over whether or not to exercise any call options and the timing thereof, which may be impacted by market conditions.

Freddie Mac may exercise call options on STACR and ACIS deals, as specified in the applicable private placement memorandum and/or offering documents and will determine when to exercise based on business objectives which may consider capital relief, cost, and other factors.
